

Aman Jha

Full Stack Developer

Passionate developer with 4 years of experience specializing in MERN stack development. Proficient in TypeScript, React, Node, Express, Next.js, I've successfully delivered responsive and robust full-stack applications, focusing on optimal coding standards within the Node, Express, and MongoDB ecosystem.

WORK EXPERIENCE

Full Stack Developer

Metro Global Solution Center • Hybrid • March 2024 - Current

- Architected and developed comprehensive Travel Management System using Node.js, TypeScript, Next.js, and PostgreSQL, managing end-to-end travel requests, visa processing workflows, and expense requisition automation for enterprise-level operations
- Built scalable backend APIs and database solutions with Node.js, Express, PostgreSQL/Prisma ORM, and MongoDB, implementing ETL scripts in Python for seamless data migration and synchronization across legacy systems
- Developed responsive frontend applications using Next.js, React, and Shadcn with efficient state management through MobX-Lite and Redux, achieving 40% improvement in application performance and user experience
- Implemented automated workflow engines and notification systems with role-based access control for employees, managers, HR, and finance teams, reducing travel request processing time by 75% through intelligent automation
- Established comprehensive testing and quality assurance processes using Jest for unit/integration testing, coordinated with QA teams for end-to-end testing, and maintained 99.8% system uptime through robust error handling
- Led full Software Development Life Cycle (SDLC) management encompassing requirements analysis, frontend system design, development, rigorous testing, troubleshooting, and deployment strategies across multiple environments
- Optimized system performance and monitoring through Winston logging, database query optimization, and scalability improvements, supporting 500+ concurrent users while maintaining enterprise-grade security and compliance standards

Full Stack Developer

Team Computers • Delhi • Nov 2021 - March 2024

- Achieve experience in DIMS (Distributed Infrastructure Management System) project using React, Node, MongoDB, Express in Typescript..
- Developed Node.js and Express APIs focused on SLA within a specific module.
- Expanded functionality to include features such as ticket tracking and real-time updates utilizing WebSocket.
- Demonstrated proficiency in overseeing the entire Software Development Life Cycle (SDLC), encompassing requirements analysis, design, development, customization,

EDUCATION

Maharshi Dayanand University - Ajmer
Bachelor of Computer Application - 2014-2017.

TECHNICAL SKILL

Frontend Technology

React JS, NextJS, Typescript, SCSS, CSS3, Javascript, Tailwind Css, Material UI, AntD, React Query, Redux, Tanstack

Budler

Vite, Webpack, Tanstack Start

Database

MongoDB, Postgres, SQL

Backend Technology

Node, Express, RESTful API, Socket.io

Technical Proficiencies

JIRA, GIT, AGILE, Jenkins, Postman,

Amazon Amplify, Vercel AI SDK

AWARDS

Finding Nemo - Metro GSC

Earned the award for Project deliverables and goals for Year H2 2024-25

Starzen Award - Metro BSC

Earned the award for achieving most challenging goals and Project for Year H1 2024

Emerging Software Developer - Team Computers

Earned the title of Emerging Software Developer for 2022 H1 in recognition of exceptional contributions.

Shining Star Software Developer - Team Computers

Recognized for 2022 H2 for contribution in software development.

rigorous testing, and effective troubleshooting and debugging.

- Utilized Jest for unit, and Cypress for e2e and component testing purposes.
- Integrated Material UI for designing UI components using scss and css3.
- Collaborated on project management using JIRA.
- Participated in planning and executing deployment strategies.
- Coordinated with QA Testers for end-to-end unit testing and postproduction testing.
- Maintained comprehensive documentation at both the programmatic and user levels, including API documentation.

Freelancing • Feb 2019 - Oct 2021

Link: <https://unicraft.tech>

- Collaborated with clients to implement e2e their company portal using NextJS
- Implemented a fully responsive and modern user interface, ensuring seamless navigation and user experience across desktop, tablet, and mobile devices.
- Optimized search engine ranking through Next.js's built-in SEO features such as server-side rendering (SSR), static site generation (SSG), and metadata management.
- Integrated Vercel Analytics to monitor user engagement and website performance, enabling data-driven improvements.
- Utilized Google Sheets as a content management system, enabling non-technical stakeholders to easily update website content. Server actions were used to securely fetch and manage this data in real-time.

CERTIFICATION & CREDENTIALS

Coding Ninjas - Advance Front-End Web Development with React - [May 2020 - Sep 2020]

Coding Ninjas - Front End | Full Stack Web Development - [Apr 2020 - Sep 2020]Id.
